EDWIN PILE PRAZERES

SOFTWARE ENGINEER | FULL-STACK

Colorado Springs, CO, USA | +1-719-744-2973 | LinkedIn | epilepra@gmail.com | Portfolio

PROFESSIONAL SUMMARY

Full-stack Software Engineer with 5+ years of professional web and software development experience, including 3+ years building enterprise applications with React and C#/.NET. Experienced in frontend/backend integration, SQL Server and Cosmos DB migrations, automated testing, and production troubleshooting. Delivers business-rule-driven features while preserving data integrity and existing behavior. Master's degree in Software Engineering.

TECHNICAL SKILLS

Languages & Frontend: C#, TypeScript, JavaScript, SQL; React, React Native, HTML, CSS, MUI, Tailwind CSS
Backend & APIs: ASP.NET Core, .NET, .NET Framework, Node.js, NestJS, REST, GraphQL (HotChocolate), microservices
Cloud & Data: Microsoft Azure (Functions, Service Bus, Blob Storage, API Management, Application Insights); SQL Server, Cosmos DB
Engineering: Async/event-driven workflows, unit/integration testing (xUnit, Jest), Git, Azure DevOps, CI/CD, Swagger/OpenAPI, code reviews

PROFESSIONAL EXPERIENCE

Software Engineer (Mid-Level) | Control Risks S.A. | Mar 2023 – Oct 2026

- Developed React interfaces and C#/.NET and Node.js services for enterprise due-diligence and screening workflows, integrating REST/GraphQL APIs with SQL Server, Cosmos DB, and Azure.
- Delivered end-to-end features across React interfaces, C#/.NET and Node.js APIs, and database models, adding fields and update workflows while preserving compatibility with existing clients and records.
- Built a resumable video-upload workflow with React, C#, and Azure Blob Storage for files up to 800 MB, coordinating parallel chunks, retries, and status-based recovery after network interruptions.
- Implemented cross-product registration integration using Azure Service Bus and a React terms-and-conditions modal, coordinating backend integration work with another engineering team.
- Rebuilt endpoints and transformed legacy SQL Server data for a monolith-to-microservices/Cosmos DB migration; preserved business rules and validated records and full application flows.
- Implemented asynchronous API functionality for screening, reporting, and matching operations, including result polling and event notifications; supported testing and production releases.
- Diagnosed inconsistent webhook data by tracing UI, API, and event-service behavior with QA; corrected outdated business logic and validated related workflows to avoid regressions.
- Wrote unit and integration tests with xUnit and Jest, reaching 60% coverage in assigned modules; reviewed code, documented API contracts, and helped teammates resolve technical blockers.
- Collaborated with designers to translate interface requirements into React components and user workflows.

Web Specialist (Web Development) | Live And Invest Overseas | Sep 2020 – Oct 2022

- Built and maintained responsive WordPress sites and custom templates; contributed to a reported 23% reduction in bounce rate.
- Optimized JavaScript, CSS, and site performance, improving page-load time by approximately 20%; maintained site security and access controls.

EDUCATION

Master's Degree In Software Engineering | *Technological University of Panama* | *2023 – 2025*
Bachelor's Degree, Mechatronic Engineer | *University of Panama* | *2015 – 2021*

LANGUAGES

Spanish and Portuguese (fluent); English (professional proficiency).
